BUILDS

The Golden Moth

BY CURT ROSEWOOD — 2024-07-01

The Golden Moth

The Golden Moth is a beautifully detailed steam punk airship designed by [Shiraz](https://www.patreon.com/Shirazs3Dworld/posts)¹. Anyone who has spent some time in 3DX will have come across other magnificent creations by this builder, such as *The Sunny Adriatic*. Builds with lots of curved shapes are always the most difficult, but this master builder clearly has no issues with them. According to the builder, this creation took about 2 months of working on it for a few hours a day. If you like to learn more about Shiraz's work, please visit her [Patreon](https://www.patreon.com/Shirazs3Dworld/posts)² where you can download lots of goodies for free.
